# Personalize Treatment for your Patients

Specialty and Pharmacogenomic (PGx) Testing Key

## TRICHOTEST™ (HAIR LOSS / ALOPECIA TEST)

- Know a patient's genetic profile related to alopecia & hair loss.
- Formulate personalized prescriptions to best treat each patient and reduce "trial & error" dissatisfaction.
- Recommend supplements tailored to each report and increase patient compliance for optimal results.
- Available with or without formulations. Formulations available for MDs, DOs, and NPs in states with FPA.

## NUTRIGEN™ (DIET / WEIGHT MANAGEMENT TEST)

- Know a patient's genetic profile related to optimal diet, general wellness, and weight loss.
- Personalized diet list considering over 550 foods & beverages.
- General, personalized supplement and lifestyle recommendations tailored to each report.

## TELOTEST™ (DNA / BIOLOGICAL AGING TEST)

- Simple test measuring patients' telomere lengths to suggest a "biological age" compared to real age.
- Retestable as often as every 6 - 12 months
- General, personalized supplement and lifestyle recommendations tailored to each report.

## PHARMACOGENOMIC (PGx)

- Know a patient's genetic profile on hundreds of prescriptions
- Prescribe the correct drug and dosage by a patient's DNA
- Protect yourself and practice from poor patient drug interactions
- History of issues with medications

## ACNETEST™

- Know a patient's genetic profile related to acne.
- Formulate personalized prescriptions to best treat each patient and reduce "trial & error" dissatisfaction.
- Recommend supplements tailored to each report and increase patient compliance for optimal results.
- Available with or without formulations. Formulations available for MDs, DOs, and NPs in states with FPA.
